

Module 1
Lesson 2

CMS Technology Overview:

Objectives:

- Identify tools and software used in CMS
- Understand components of Google tools
- Understand other apps such as PowerSchool used by teachers and schools

Materials needed:

- Computer
- Paper
- Pencil or pen

Teacher	Learner
<p>Opening: Teacher: Starting off with a pre-quiz. It is only 4 questions. This is just to get a baseline of individual knowledge of technology used in CMS</p>	<p>Pre-Quiz: Complete on a sheet of paper</p> <p>Have you used google drive before?</p> <p>How much do you know about the software that your child's school uses?</p> <p>How does your child's teacher use hardware/ software in the classroom?</p> <p>What questions do you have?</p>
<ol style="list-style-type: none"> 1. Pull up powerpoint that covers software and hardware 2. Have learners write down any types of hardware or software that they know of 3. Go over difference of hardware vs software 	<p>Write down examples of hardware and softwares</p>
<ol style="list-style-type: none"> 1. After learners write down examples then move onto different types of hardware 2. Have learners write down a few notes about the different types of hardware 3. Go over BYOD and CMS policy on it 	<p>Take notes</p>
<ol style="list-style-type: none"> 1. Go over a few examples of common classroom software used 2. Explain each on the slide, then give learners 5 to 10 minutes to explore these softwares on their own. Help them access each site by explaining how to get to them using a computer or tablet 3. 	<p>Explore at least 3 of the softwares</p>

Teacher	Learner
<p>To end the lesson do a mini post assessment. Have students write down 5 things they learned about hardware and software used in CMS schools. Then, write down 2 questions that they still have about this topic. Do this on a sheet of paper</p>	<p>Write down 5 things they learned</p> <p>Write down 2 questions they still have</p>
